Perennials and
Rock Garden Plants

Washington Street Route 6
Fairhaven, Mass.
Tel. New Bedford 1072-W2

Here is HOW to get to Van's Retail Nursery.

From Providence Route 6 to Fall River and New Bedford over the Fairhaven Bridge, just 3 miles east of the Bridge.

From Boston (Mattapan) Route 28 up to the Light House Pillars in Wareham, turn right follow directions for Route 6. Just 11 miles from Route 28 over Marion and Mattapoissett.

The trip to Fairhaven is a very interesting one at any time. The scenery is different, the roads are good, the climate always better and points of interest many. Growing conditions are ideal for most everything that grows. We invite you to Fairhaven with its miles of beaches on Buzzards Bay at the head of Cape Cod.

VAN'S Nursery and Landscape Service

VAN Has The Answer

THE answer to the planting of difficult places such as the Woodland Slope, the Garden Wall and the Shaded Foundation is Azaleas, Rhododendrons and Mountain Laurels. Few other plants will give you the permanent effects, the great variety of color and even fragrance can be secured with the planting of Azaleas, Rhododendrons and Mountain Laurels.

Our Azaleas (Cape Cod Grown) are hardy, the size of flowers and the various colors are outstanding. The glowing colors and the fragrance typical of Azaleas is unsurpassed in the early Summer months and surely the Woodland Slope could not be planted more permanently than with these Azaleas.

The Rhododendrons with their large leathery foliage and extremely large clusters of flowers do add character to any planting. Planted of west and north exposures these plants will be perfectly hardy with our average winters. Many will flower the first season after planting. Our stock does include many unusual colors, the size of flowers is greater and some plants are fragrant since this stock has been crossed with the very large flowering and fragrant Rhododendron Fortuni.

About all our Mountain Laurel are the large flowering pink type. Beautiful large glossy foliage raised from selected stock is perfectly hardy. This stock has been grown unprotected in the nursery row, the least I can say is that this is the finest stock I have ever seen.

Plan your planting of Azaleas, Rhododendrons and Mountain Laurels the sure way for the most effective results, take advantage of the Expert Service offered by Van. It will pay you in economy of time, and expense and the results will be gratifying to you.

Please note our extremely low prices for this really beautiful material.

	each	10	100
Azalea Calendulacea	Flame Azalea		
18 to 24 inch	2.50	22.50	200.00
2 to 3 feet	3.50	30.00	250.00
3 to 4 feet	4.50	37.50	350.00
Ghent Hybrids	Ghent Azalea		
18 to 24 inch	3.00	25.00	225.00
2 to 3 feet	4.00	35.00	300.00
3 to 4 feet	5.50	47.50	425.00
Rhododendron Hybrids	Dexter's Hybrids		
18 to 24 inch	2.50	22.50	200.00
2 to 3 feet	3.50	30.00	275.00
3 to 4 feet	4.50	42.00	400.00
Kalmia Latifolia	Mountain Laurel		
18 to 24 inch	2.50	22.50	200.00
2 to 3 feet	3.50	30.00	275.00
3 to 4 feet	4.50	40.00	350.00

Specimen plants are available at times and when interested see our stock first. You may select plants when in flower at a slightly higher price. Leafmold and Peatmoss available.

The following items are but a few selected from our list of over 1000 hardy types of plants.

Fairhaven, Mass.

Mr. H. P. Gould.
Washington.

April 15, 1939

Dear Sir:

The time is here to plant Azaleas, Rhododendrons and Mountain Laurels. For the Woodland Slopes, for the Garden Wall and the Shaded Foundation there are but few more colorful items and the fragrance of the Azaleas can hardly be duplicated, and NOW is the time to plan this planting.

Van has available for your selection not only the smaller sizes of Azaleas Rhododendrons and Mountain Laurels but many of the larger sizes also.

AZALEAS, many of 4 feet and over with many flower buds. Colors in such wide range as to include the rather unusual to date among the Hybrids ever seen, Copper, Red, Pink, Orange, Salmon, and many inter-shadings which are most difficult to even describe. In addition to this the size of these flowers varies considerable and many real large flowers in clusters are found among these plants. Hundreds of plants have been labeled, giving the color as near as possible with an approximate quality of the flowers, thus enabling you to select the color and quality you desire.

RHODODENDRONS, too, come in many sizes and colors. Each one of these plants must be considered as an individual. Some may grow upward and narrow while others may dwarf themselves and give great spread. Some have dark green and abundant foliage while others may have lighter green foliage less abundantly. The Whites are not plentiful, the Pink colors run the race with the lighter and darker shadings, and the Reds are always bright. Every plant has flowered this year and flower buds show for the next season. All the plants have wintered unprotected from the start.

MOUNTAIN LAUREL, one of our finest native evergreen Shrubs, comes only in the larger size flowers and almost every plant is of the bright large pink, extremely showy with their abundant dark green foliage. There are no finer plants available anywhere for group plantings. One should make no comparison to any collected native stock. All of Van's Mountain Laurels are raised from Selected Specimen Plants. Grown unprotected in the Nursery Row. Plants run from 2 feet to 4 feet in height.

Prices for this unusual stock are very reasonable. You will find it both pleasant and profitable to visit Van's Nursery which is conveniently located on U. S. Highway No. 6, just three miles east of New Bedford. You and your friends are cordially welcome.

Plan your planting of Azaleas, Rhododendrons, and Mountain Laurels the sure way for the most effective results by taking advantage of the Expert Service offered by Van. It will pay you in economy of time and expense, but most of all in results that will be truly gratifying to you.
